SAMPLES FOR INSPECTION. List of Prices and other
Particulars may be obtained at the Office, A. Gouldhall-Clarendon

SEWERAGE of LONDON.—The attention of the CIVIL ENGINEERS is appointed to determine upon the most efficient material for the construction of the sewers of London. It is particularly directed to the ASPHALT of STREETS, which, more than any other material, is applicable to the construction and internal coating of Brick Galleries, and other channels for drainage. The experiments made by the Royal Academy of Sciences, at the Arsenal, in the year 1784, and the subsequent survey of Plymouth Citadel, contained of Resin Asphalted Brickwork, under the order of the Honourable Board of Ordnance has fully proved the superiority, advantages, and strength of Resin Asphalt over all other cementitious compositions. A printed account of these experiments can be had on application to J. F. BIRKBE, Secretary to Resin Asphalt Company, "Clarifier's Patent." Established 1836.

Note. The application of the Asphalt of Resin is especially recommended by the Commissioners on the Pile Area, for covering the ground line of brickwork in marshy situations, and it has been used in the construction of the sewers of the City of London, and in the construction of the

2. A new machine has been manufactured in France, and, through long detention at sea, has often proved stale and unfit for use on its arrival in London. By the arrangement now made, the Cement will be manufactured in London, and thus presented to consumers in a fresh and genuine state, by the sole Agents, J. & WHITE and SONS, 11, Mark Lane, London.

KEENE'S AND PARIAN CEMENTS
For internal stucco, are employed very advantageously in the place of wood for shingles, architects, and panel mouldings, and for fire-brick flooring, instead of stone. The peculiar properties of PARIAN Cement allow of its being painted or papered upon within a few hours of its application, and thus render it an important substitute for common plastering in those cases where the durability of the work is of great importance. For further particulars apply to J. B. WHITE and SONS, 100, 102, 104, 106, 108, 110, 112, 114, 116, 118, 120, 122, 124, 126, 128, 130, 132, 134, 136, 138, 140, 142, 144, 146, 148, 150, 152, 154, 156, 158, 160, 162, 164, 166, 168, 170, 172, 174, 176, 178, 180, 182, 184, 186, 188, 190, 192, 194, 196, 198, 200, 202, 204, 206, 208, 210, 212, 214, 216, 218, 220, 222, 224, 226, 228, 230, 232, 234, 236, 238, 240, 242, 244, 246, 248, 250, 252, 254, 256, 258, 260, 262, 264, 266, 268, 270, 272, 274, 276, 278, 280, 282, 284, 286, 288, 290, 292, 294, 296, 298, 300, 302, 304, 306, 308, 310, 312, 314, 316, 318, 320, 322, 324, 326, 328, 330, 332, 334, 336, 338, 340, 342, 344, 346, 348, 350, 352, 354, 356, 358, 360, 362, 364, 366, 368, 370, 372, 374, 376, 378, 380, 382, 384, 386, 388, 390, 392, 394, 396, 398, 400, 402, 404, 406, 408, 410, 412, 414, 416, 418, 420, 422, 424, 426, 428, 430, 432, 434, 436, 438, 440, 442, 444, 446, 448, 450, 452, 454, 456, 458, 460, 462, 464, 466, 468, 470, 472, 474, 476, 478, 480, 482, 484, 486, 488, 490, 492, 494, 496, 498, 500, 502, 504, 506, 508, 510, 512, 514, 516, 518, 520, 522, 524, 526, 528, 530, 532, 534, 536, 538, 540, 542, 544, 546, 548, 550, 552, 554, 556, 558, 560, 562, 564, 566, 568, 570, 572, 574, 576, 578, 580, 582, 584, 586, 588, 590, 592, 594, 596, 598, 600, 602, 604, 606, 608, 610, 612, 614, 616, 618, 620, 622, 624, 626, 628, 630, 632, 634, 636, 638, 640, 642, 644, 646, 648, 650, 652, 654, 656, 658, 660, 662, 664, 666, 668, 670, 672, 674, 676, 678, 680, 682, 684, 686, 688, 690, 692, 694, 696, 698, 700, 702, 704, 706, 708, 710, 712, 714, 716, 718, 720, 722, 724, 726, 728, 730, 732, 734, 736, 738, 740, 742, 744, 746, 748, 750, 752, 754, 756, 758, 760, 762, 764, 766, 768, 770, 772, 774, 776, 778, 780, 782, 784, 786, 788, 790, 792, 794, 796, 798, 800, 802, 804, 806, 808, 810, 812, 814, 816, 818, 820, 822, 824, 826, 828, 830, 832, 834, 836, 838, 840, 842, 844, 846, 848, 850, 852, 854, 856, 858, 860, 862, 864, 866, 868, 870, 872, 874, 876, 878, 880, 882, 884, 886, 888, 890, 892, 894, 896, 898, 900, 902, 904, 906, 908, 910, 912, 914, 916, 918, 920, 922, 924, 926, 928, 930, 932, 934, 936, 938, 940, 942, 944, 946, 948, 950, 952, 954, 956, 958, 960, 962, 964, 966, 968, 970, 972, 974, 976, 978, 980, 982, 984, 986, 988, 990, 992, 994, 996, 998, 1000.

PORTLAND CEMENT, as manufactured
by J. M. WHITE and SONS, possesses all the properties of the best Portland Cement, but has the advantage over that material of being so easily worked, that it can be used in any position, require no form work in damp situations, and requires no coloring. Employed as an hydraulic mortar for brickwork, it causes brick to fire stronger of sand to one of cement, and is proved by trial to become harder and stronger in those proportions than the best Portland Cement, and is the only hydraulic mortar in the United States, combined with its eminently hydraulic properties, that it is not the fittest material for building sea and embankment walls, the lining of reservoirs, cisterns, and basins, and for all those purposes where strength and a perfect resistance to water are required.

Manufactured by J. M. WHITE and SONS, Willamette Street, West
Portland, and J. M. White, Denver!

PORTLAND CEMENT of superior colour
and hydraulic properties.
STAFFORDSHIRE VITRIFIED BRICKS.
GLAZED PIPES and FIRE BRICKS.
FREEMAN and RICHARDSON, 9, South Wharf, Paddington.

PORTLAND CEMENT. MANUFACTURED BY WILLIAM AINSPO, Son & Co., Portland Cement Works, Portland, Dorset, England. For references to No. 100, 99, 98, 97, and also Nos. 94 and 95, see Nos. 43 and 33, of "The Builder." For accounts of EXPERIENCE on the strength of Portland Cement, wherever the great superiority of their Cement is manifest. This Cement has been used in the construction of the great works of the world, and to reward the action of water; it is stronger in its organization, qualities, harder, and more durable than any other description of Cement; it does not separate, oxidize, or turn green; nor is it liable to the action of frost and heat. It is manufactured to get from five to thirty minutes. For all purposes, this Cement is applicable the Proprietors challenge comparison—offers superior results in the construction of the great works of the world, and is sold in the North-East, Kent, and their Wharf Great South-East, and Whitehall, also at their Depot, 4, Manchester Street, Liverpool.

THE PARIAN CEMENT, for INTERNAL
STUCCO.

No. 4, Forbush-Verrier North, Paddington,
18th February, 1888.
Dear Sirs—I have been reading the notice
Pariss Cement, until sufficient experience enabled me to do so.
As an extensive builder I have given it many trials, and now beg to
express my perfect satisfaction with it. The house from whence
this was first introduced by me on 7th September last, and a brief
history being laid before the 1st of June—that is to say, in three
months and one day, was finished, and the house was ready to
Pariss: painted some, painted and marbled others; and the
whole work has been dry and perfect from that hour. I need say
no more—I am, Gentlemen, yours respectfully.

JOHNS and CO.'S
PATENT PERMANENT STUCCO WALL
WITHOUT MIX OR OTHER CORRUPTIBLE

ISOREGENT
JOHN & CO. having effected some important improvements in the manufacture of this very useful material, respectfully call to the notice of the Trade and the public generally, the new process of making and the new and valuable uses to which it is adapted for STUCCO or BRICK WORK. It is a fine Colour, but may be tinted in any other—DOES NOT WASH OFF—is perfectly dry in twenty-four hours, and, before a sun-dormer, is admirably adapted for Railway Stations, Urban Workhouses, Barracks, Schools, Prisons, &c. (new cast) will cover 100 sq. yds. It will keep good for years, and **MAY BE EXPORTED WITH FREIGHT**

JOHN W. COO'S STEEL CONCRETE. This cement, from the great reduction in price, and its adaptability for internal as well as external purposes, places it above all other materials of its kind; it has no equal; whatever may be painted or papered with it is safe from decay, and it is not injured by exposure to hard snow, and may be cleaned with a brush and water. The merits of the **PAINTE** are well known for its application to stone work of all kinds, and external work generally. Numerous testimonials, prospectuses, and every information may be obtained, on application to the Sole Agent, **PHILIP HANSEN**, 100 Broadway, New York, or to the **Upper Thames Street**. A liberal allowance to individual dealers.

MARTIN'S PATENT
FIRE PROOF AND ORNAMENTAL CEMENT,
APPLICABLE FOR
ALL INTERNAL PURPOSES WHERE PLASTERING

This valuable Cement has been before the public many years, and obtained an high standing in the estimation of all who have used it. It is unnecessary to comment on its merits. Messrs. R. T. & E. C. Smith, the sole agents for the West of England, from the great assistance it affords, give quantities of CEMENT free of charge. The CEMENT is of the best quality. MARVIN will cover, as compared with other Cements for its terminal use, there will be found a gain of 141 per cent. in material and 10 per cent. in labour, and a saving of 10 per cent. in the cost of 10 per cent. by its allowing about forty minutes for working, less than one tenth of the time of other cements of a similar nature. Therefore, with greater facility, making together the saving of 10 per cent. of cost of material and 10 per cent. of labour, therefore cannot admit of doubt. Applications, showing its beauty, hardness, and applicability to all plain and ornamental purposes, may be sent; and the Cement, in any quantity, obtained from the Agents, Messrs. R. T. & E. C. Smith, and F. & J. 188, Drury Lane, London - Manufacturers, Liverpool Mill, Derby.

N.B. This Cement will receive paint or paper to a few hours after it is laid.

BELL'S PATENT LIQUID CEMENT.—
 Made for use on the front of houses, only one-eighth the
 cost of oil paint; for beauty it is pre-eminent, giving the appear-
 ance of fine cut stone. In casks of 1, 3 and 5 cwt. at 6s. 12s. 18s.

Patent Internal Paint, invaluable for cheapness, heat and permanence. Ready for use. Will stand any climate, and is calculated for exportation.

New Elastic Paint for Damp Walls: an effective remedy, inside or out. Will dry in a few hours, and may be repeated at once, if desired.—G. BELL & Co., Mason Mills, 2, W. Harrison-street, Oswestry.
